WORK EXPERIENCE

Big Ben Group

December 2024 – Present

Front-End Developer

Pulilan, Bulacan (On-Site)

- Architected and maintained a comprehensive **Enterprise Resource Planning (ERP) system** used across multiple departments, consolidating fragmented business workflows into a single, unified platform and reducing manual process overhead.
- Engineered new features and maintained core functionalities using **React.js, Next.js, and TypeScript**, delivering responsive, performant interfaces that improved day-to-day usability for internal users.
- **Pioneered the adoption of TypeScript and Shadcn UI** across the development team for improving type safety, reducing runtime errors, and establishing a consistent, scalable component system across the codebase.
- Spearheaded the **revamp of legacy web systems**, modernizing the UI/UX from the ground up — resulting in a significantly more responsive, accessible, and visually consistent interface across the platform.
- Built and maintained a **reusable component library** using Material UI, Tailwind CSS, and Shadcn UI, reducing redundant code and accelerating feature development timelines across the ERP modules.
- Collaborated closely with **UI/UX designer, department heads, and top management** to translate business requirements and design concepts into interactive prototypes and functional features — ensuring deliverables aligned with both technical standards and organizational goals.
- Produced **design mockups and prototypes** independently to validate UX decisions early, minimizing revision cycles before development handoff.

Pro-Solutions Technology, Co.

February 2024 – December 2024

Front-End Developer

Malolos, Bulacan (On-Site)

- Owned and maintained **four major production systems**—Accounting (AMS Lampara), Learning Management (LMS Lampara), Kiosk, and Student Portal/Enrollment System (SMS Lampara)—ensuring high availability, seamless feature deployments, and stable system performance.
- Diagnosed and resolved critical bugs and system issues across multiple modules by identifying root causes and implementing effective fixes, significantly improving system reliability and user experience.
- Participated actively in code reviews with senior developers, product managers and product owners, and optimized features or code segments, and ensure features met both technical standards and end-user needs, resulting in improved performance, maintainability, and adherence to best practices.
- Developed and enhanced system features using **React.js, Next.js, and TypeScript**, contributing to scalable, maintainable codebases while consistently delivering solutions on schedule.
- Transformed concepts and requirements into **design mockups and interactive prototypes**, strengthening layouts and improving site interactions before development handoff.
- Built reusable components to accelerate development timelines and improve overall code quality.
- Revamped existing systems and web applications to enhance performance, usability, and maintainability.

Freelance Full Stack Developer

January 2023 – November 2024

Full Stack Web Developer

- Translated concepts into interactive design mockups and prototypes to improve usability, strengthen layouts, and enhance overall user experience.
- Delivered comprehensive user support and training to clients, primarily students working on capstone/thesis projects, addressing questions and guiding them through system usage.
- Oversaw back-end development using PHP, Next.js, Express.js, and database technologies (MySQL, PostgreSQL, Prisma, Supabase) to ensure website integrity, data consistency, and secure operations.
- Developed full-stack web applications using React, Next.js, HTML, CSS, JavaScript, and jQuery, implementing responsive designs, dynamic features, and optimized workflows.
- Integrated modern authentication and authorization solutions (BetterAuth) to secure user access and protect sensitive information.

Bulacan State University – Malolos Campus

May 2023 – November 2023

Full Stack Web Developer

Client: Kapitangan National High School, Paombong, Bulacan, Philippines

- Developed a **full-stack web application (Enrollment System)** for Kapitangan National High School as a client-based capstone project, handling both frontend and backend development end-to-end.
- Built and managed **relational databases and table structures** using MySQL, ensuring data integrity and efficient querying across all application modules.
- Developed the backend using **Vanilla PHP**, implementing server-side logic, RESTful endpoints, and database interactions to support core application functionality.
- Designed and built a responsive frontend using **Bootstrap, JavaScript, and jQuery**, delivering a clean and accessible user interface optimized for school staff and students.
- **Deployed and hosted** the dynamic web application on Hostinger, managing domain configuration, server setup, and live deployment.
- Delivered a **scalable and highly available** web product, tested thoroughly before handoff to the client institution.

TECHNOLOGIES & SKILLS

- **Languages:** JavaScript, TypeScript, PHP, HTML, CSS, C# (Unity)
 - **Frameworks & Libraries:** React.js, Next.js, (PHP) Laravel, Node.js (Express.js), Redux, Redux Toolkit, RTK Query, TanStack Query, Axios, JQuery, Bootstrap, Tailwind CSS, Material UI, Material Tailwind, Shadcn UI, Next Auth / BetterAuth, React Hook Form, Zod, React Router, Chart.js / Recharts
 - **Testing:** Jest, Vitest, React Testing Library
 - **Databases & Backend Services:** MySQL, PostgreSQL, Supabase, Firebase, Prisma ORM, BetterAuth
 - **Tools & Platforms:** Git, GitHub, Postman
 - **Skill Set:** Frontend Development · Full-Stack Web Development · Backend Development · Component Architecture · Game Development (2D)
-

EDUCATION

Bulacan State University (Main Campus)

College - Bachelor of Science in Information Technology, Major in Web and Mobile Development

2019-2024

Malolos City, Bulacan

Baliuag University

Senior High School(SHS) - Science, Technology, Engineering, and Mathematics

2017-2019

Baliuag City, Bulacan

St. Dominic Academy

Junior High School

2014-2016

Pulilan, Bulacan
